IRMA

Innovative Radiation Monitor for contAiners at port custom gates

Progetto cofinanziato dal POR FESR
Toscana 2014-2020

Azione 1.1.5 sub A1

The image displays the IRMA system components and interface. On the left, there is a stylized logo of a crane with a radiation symbol and the text 'IRMA'. Below it are icons for a crane, a radiation detector, a person wearing a hard hat, and a hand interacting with a control panel. In the center, a large red panel shows 'REACH STACKER SENSOR4_A101' with a prominent 'ALERT' message and '> ALERT RUNNING'. Below this are buttons for 'STOP RILEVAMENTO' and 'GESTISCI ALLERTA', and a 'RILEVATORI' section with numerical indicators. To the right, a software interface window titled 'RILEVATORE 1' shows a line graph for 'Sensore Alto' and 'Sensore Basso' over time (07:05:00 to 07:06:30), and a bar chart for 'dangerLevel'. A 'BACK' button is visible in the top right of the interface. At the bottom, a smartphone displays a list of sensor IDs (AA002) with a red alert icon for the first entry.
